

PROPRIETARY BEAMTIME RECORD FORM

.....

Before starting any APS experiment that you may wish to designate as proprietary, please ensure that the two conditions listed below have been met. (This information can be verified with Heidi Homerding, (630) 252-1244, useracct@anl.gov.)

1. Your home institution has established a Proprietary User Account and you know the 5-digit account number.
2. Your home institution has deposited a cash advance in this account, which is sufficient to cover the amount of proprietary beam time you plan to use during the ensuing three (3) months.

Within 30 days after any continuous usage of beam time for work that you wish to designate as proprietary, please fill in the information below and return this form to an APS Floor Coordinator and a copy to the CAT. The APS will use this form for accounting purposes and will retain it as confirmation that proprietary rights apply to the work performed on the specified beamline during the specified time period. Any beam time usage segment that is not reported as proprietary by the User within 30 days, via submission of a Proprietary Beam Time Record form to the APS, will be regarded by the APS as nonproprietary.

.....

Your home institution: _____

Your home institution's 5-digit Proprietary User Account number: _____

Your name (please print): _____

CAT name: _____ and/or Beamline and station used (e.g., 25-BM-B): _____
(required)
